SUMMARY

Senior Data Analytics & Business Intelligence professional with 20+ years of experience across analytics, data management, marketing strategy, and reporting in enterprise and client-facing environments. Experienced in developing data models, automated data pipelines, KPI and measurement frameworks, and BI solutions using Power BI, SQL, Python, and cloud technologies. Combines hands-on technical expertise with a strong background in marketing analytics, data quality, business strategy, and translating complex data into actionable insights for executive, client, and business stakeholders.

TECHNICAL SKILLS

BI & Reporting	Power BI (semantic modeling, DAX, Tabular Editor, calculation groups), SSRS, Tableau, Looker Studio
Data & Analytics	SQL, Python, R, DAX, Power Query (M)
Cloud & Data	Azure SQL, Azure Blob Storage, Azure Functions, AWS, Google Cloud Platform
Data Modeling	Dimensional modeling, star schemas, fact and dimension design, conformed dimensions, semantic models
ETL & Automation	Python ETL, SQL transformations, Alteryx, scheduled pipelines, incremental loads, data validation and reconciliation
Quality & Governance	KPI standardization, data quality, data validation, attribution/UTM governance, master data management
Marketing & Social	GA4/UA, GTM, Adobe Analytics, Brandwatch, Meltwater, Sprinklr, Hootsuite, Helixa
Platforms & Tools	Git/GitHub, Salesforce, IBM InfoSphere DQI, Jira, MicroStrategy

SELECTED PROJECT

NorthStar Intelligence Platform | Independent Project

Jul 2025 – Present

Power BI • SQL • Python • Azure • Data Modeling • ETL | github.com/Ams1078/northstar-analytics-platform

- Built an end-to-end analytics platform integrating automated Azure/SQL/Python data pipelines, dimensional modeling, marketing and prospect-journey attribution, Power BI semantic models, data-quality reconciliation, and executive reporting.
- Developed executive BI reporting, a six-model marketing Attribution Lab, and a pipeline operations dashboard supporting refresh monitoring, reconciliation, validation, audit history, and system health.
- Professional Development** — Microsoft PL-300 certified; currently preparing for the **CDMP Master-level certification track**, with continued study in data management, governance, data quality, and metadata management.

PROFESSIONAL EXPERIENCE

Wondros

Jul 2021 – Jul 2025

Senior Data Analyst / Strategist - Marketing | Los Angeles, CA

- Created and presented data-driven performance insights to executive and client audiences, translating campaign, audience, and performance data into strategic recommendations.
- Partnered with paid media, earned media, creative, and business teams to analyze multi-source marketing data and develop campaign optimization strategies, including an initiative that **improved ROI by 50% within two months**.
- Designed and automated data extraction, validation, and transformation workflows using Python and SQL, improving data reliability and reducing manual reporting effort.
- Designed and implemented analytics, measurement, and KPI frameworks across multiple client environments, configuring Google Analytics and Google Tag Manager and establishing consistent reporting definitions.
- Established measurement governance standards, including UTM structures, naming conventions, tagging, and validation processes to improve attribution and reporting accuracy.**
- Led analytics and measurement initiatives for national healthcare and public-sector programs, including the NIH All of Us Research Program and California HCAI**, working across client, agency, and partner teams.

Mid-America Apartment Communities (MAA)

Feb 2022 – Feb 2023

IT Data Management Analyst – Marketing | Memphis, TN

- Partnered with Marketing and IT teams to define reporting requirements, KPI definitions, and data needs, translating business requirements into enterprise BI and reporting solutions.
- **Developed and modernized enterprise reporting using SSRS and Power BI**, supporting the transition from legacy tabular reporting to interactive visual BI dashboards for marketing and operational performance.
- Partnered with IT on migrating enterprise data warehouse content into curated reporting/data-mart structures, improving consistency of business definitions and downstream reporting.
- **Automated recurring reporting and data workflows, improving data quality and reducing reporting turnaround time by approximately 40%.**

Station Digital Media

Aug 2020 – Jul 2021

Business & Marketing Analyst | Long Beach, CA

- **Served as Product Manager/Product Owner for an enterprise automotive OEM KPI dashboard product**, defining requirements, prioritizing enhancements, and partnering with engineering and UI/UX teams on product development and reporting functionality.
- **Led push-notification marketing analytics for major automotive OEM clients including Mazda, Toyota, and Subaru**, analyzing engagement and campaign performance and translating results into client-facing insights and recommendations.
- **Defined KPI and reporting requirements for the dashboard platform**, translating business and client needs into product features, visualizations, and actionable performance reporting.
- Managed the product development lifecycle, including Jira stories, release planning, QA/regression testing, and coordination across technical and business teams to ensure accurate and reliable releases.

Hyundai Motor America / Genesis Motor America

Jun 2018 – Aug 2020

Business Analyst - Sales & After Sale | Fountain Valley, CA

- **Supported the development of analytics and reporting for Genesis Motor America** during the growth of Hyundai's newly established U.S. luxury division, working directly with senior managers and executive leadership across a lean national organization.
- **Developed Tableau dashboards and KPI reporting across sales and after-sales operations**, consolidating dealer, regional, and national performance into standardized reporting for business leadership.
- Analyzed sales, service, warranty, and financial performance data to evaluate dealer and program performance and support national after-sales initiatives.
- **Developed KPI frameworks and dealer scorecards** with senior and executive stakeholders, delivering weekly and monthly reporting used to monitor performance against business and parent-company objectives.
- **Automated recurring analytics and reporting workflows using Alteryx, integrating enterprise data sources and reducing manual reporting effort by approximately 8 hours per week.**

Quest Software \ Dell Software Group

Nov 20 – Dec 2017

Data Analyst Lead – Enterprise Data Quality / Sales Ops | Aliso Viejo, CA

- **Progressed from Contractor to Data Steward and Data Quality Lead** following a two-year enterprise data remediation initiative that reviewed, standardized, deduplicated, and aligned **200,000+ global customer accounts** between Siebel CRM and Oracle financial systems.
- **Managed enterprise CRM data quality and governance across North America, EMEA, and APAC**, maintaining controlled account creation, hierarchy standards, deduplication, and master-data integrity in Siebel and later Salesforce.
- Supported M&A data integration using IBM InfoSphere Data Quality (DQI), applying probabilistic matching and survivor record logic to reconcile acquired company records with existing Salesforce entities.
- **Documented enterprise data-quality procedures and CRM standards** and trained Sales teams and newly hired Data Quality staff on account creation, data-quality requirements, and processes designed and business processes.

EDUCATION & CERTIFICATIONS

Education

California State University, Long Beach — B.A., Philosophy, Emphasis in Logic

Certifications

Microsoft Certified: Power BI Data Analyst Associate (PL-300) • Google Data Analytics Professional Certificate (Coursera) • Microsoft Technology Associate: Database Administration Fundamentals

In Progress

Microsoft Azure Fundamentals (AZ-900) • DAMA Certified Data Management Professional (CDMP), preparing for Master-level certification track
